21. What did you like about the class?	-Instructor communicated clearly. Related material to real-world situations. -A lot of practices. Good friends. -I did learn to model parts and make drawings and assemblies using Pro/E 2001. -The CDs in each class were very handy and good instructions. -Presented at a good pace. -Pro/E itself. -Facilities and equipment. -The way the teacher explains. -I thought the professor showed a great idea of practice in the exercises we did.							
22. What improvements would you suggest about the class?	-Teach Wildfire instead of 2001 version of Pro/E. -You should upgrade your computers to be faster! -The homework should be comparable to the Pro/E that we used in the company, not the educational Pro/E that we used here. -None. Keep it up. -More examples of concepts to further understand. -Nothing. I thought the class provided everything for my education.
